I am a Front End Developer who loves developing creative and interactive content. My favorite tools are React/Next and CSS with Sass. Although my previous career was not IT related, I am very excited to focus on coding and web development. This was a passion of mine when I was younger (playing around with dreamweaver, photoshop, msdos) and I love to dive deeper into it.

I am a very keen and fast learner who is always interested in the next thing.

I am:

- dedicated (studying to code whilst working/family )
- independent (self employed for the past 6 years)
- teamplayer (people person, who thrives on interaction)
- problem-solving and hitting targets come naturally to me

See the next page for more details or have a look on my portfolio or github.

Javascript

Api's

Express.js

Mongodb

React

Git

Next.js

# Skills other:

Dutch

German

English

Team management skills

Project management skills

Analytical skills

People skills

I am a very inquisitive and adaptive person, who loves to create and learn new skills in life. I am very passionate about societies, the environment and clean tech.

## My education:

- A levels in Maths, Science, Chemistry, Biology, English, Dutch and German.
- Degree in Hospitality Management
- All tech related skills are self-taught

My previous careers includes multiple hospitality management positions in various countries, ski instructing and guiding, managing a large cattle farm in France and trading in stocks and bonds.

I am very open-minded and adaptive. My main prerequisites are that I can continue to learn and develop myself. And that I can contribute in developing something that I love in a great and supportive environment.
