LinkedIn

Github

I rediscovered an old passion of mine and started learning JavaScript on the side. From there on it snowballed into anything to do with front end development. Learning online and gaining various certificates through FreeCodeCamp, Udemy, Hackerrank and more. I have built various small projects which you can see on my portfolio.

2022

At the moment I am starting my first paid project for a small business, which will be a website with a secured part which will be used by the staff to update on job progress, highlight problems, etc (built in Next.js and TypeScript). I am also doing some volunteering for a small Charity for children in Tanzania, helping them with their website (hekimatz.org).

Stock and Forex trading from home, UK
self employed, working from home
