PERSONAL PROJECTS

Landing page => Landing page for one of my favourite brands   fascinating-gaufre-4f82a8.netlify.app/

- Built with Next.js, Typescript and CSS with Sass and hosted on Netlify.
- Managed state with context hook, used several other hooks for scroll and position detection to animate content.
- Implemented visual effects through image manipulation with GIMP.

Portfolio => My personal portfolio, showcasing my personal development   www.iambram.co.uk

- Built with Next.js, Typescript and CSS with Sass and Styled Components and hosted on Netlify.
- Using various techniques to create a visual user experience which is both animating and informative.
- Lighthouse score pc/mob: 99 98 92 100 / 94 96 100 100. Focused on a small LCP for fast loading and a good SEO score.

Weather app => Weather app for your personal location.   optimistic-lewin-59be2b.netlify.app/

- Built with Next.js, Typescript and CSS with Sass. Used Axios, Netlify functions, Chartist and Leaflet mapping.
- Dynamic temperature display, weather map with several layers. Using Openweathermap API.
- Handled incoming json from multiple API calls to display data in an interactive way.
